2. THE GAP, STATED PLAINLY

A patient in Agege looking for a dentist finds your listing, sees that you are open and that you have a number, and taps. That is where it stops. There is no link, so there is nothing to read about what you treat, what a visit costs, or how to book without calling. A dental decision is made slowly and with reading. Your listing does not offer any reading.

The one-line version: your listing proves you exist and gives a phone number. It gives the patient no way to learn anything else. One link changes that.

3. FIRST THREE FIXES, IN ORDER

Fix 1 — Put a link on the listing

Open the listing in Google Maps, choose "Add website", and paste a link. A simple page listing your services, hours and how to book is enough. About ten minutes.

Fix 2 — Add photos of the clinic

Upload the reception, the treatment room and the entrance so a nervous patient knows what they are walking into. Dental visits are anxiety purchases. Familiarity reduces that. You can do this from your phone.

Fix 3 — Ask patients for reviews

The listing has a "Write a review" button. Ask patients you have treated recently for an honest review. Review volume is one of the signals Google uses to decide who appears first in local search, and it compounds.

4. WHAT THIS IS WORTH TO YOU

A dental patient is worth far more than a single visit — they come back, and they bring family. The listing you already own is free and it is currently doing the least it can do. Fix 1 costs ten minutes. Fixes 2 and 3 cost nothing but an afternoon.

There is no charge for this audit and no obligation. If you would rather have someone do the three fixes with you than read about them, that is what we do — Google Business Profile setup from ₦15,000.
